Subject: Willamette River Superfund Clean-Up

September 6, 2016 2:44 pm PDT

Dear EPA

I live in Vancouver WA, but do a lot of kayaking on the Willamette River since I keep my kayak at Portland Kayak on Mccadam Ave near the Sellwood Bridge. I also kayak alot in the Superfund area around Cathedral Park in North Portland near the St John's Bridge.

My thoughts

Your EPA plan removes far too little contaminated sediment from the river. I would like

to see at least 1000 acres of polluted sediment be removed. I also want to see the clean

up be enough to end the Fish Consumption Advisory for all individuals. Your plan to "Monitor Natural Recovery" is too limited as it leaves polluted material in the river.

Thank you for the opportunity to comment.

Sincerely

(b) (6)

Vancouver, WA 98661
